

CONTINUOUS MEMBRANE PRESS

High output capacity guaranteed by the continuous cycle operation. Soft and calibrated pressing, a typical feature of membrane operation. Fractional must separation obtained through progressive regulation of working pressures. Complete juice extraction from marcs ensured by the pressing technique. These are the strengths of presses in the revolutionary PCM Series. The new generation of machines able to load product and unload marcs without any interruptions.

MODEL	TANK SIZE	NO. OF PRESSING CAMBERS	LOAD CAPACITY OF CRUSHED GRAPE	LOAD CAPACITY FERMENTED GRAPE	MAX POWER EMPLOYED	PRICE
PCM100	220 Hℓ	6	10 - 16 ton	13 - 22 ton	24.2kW	
PCM200	350 Hℓ	6	18 - 25 ton	25 - 33 ton	43kW	
PCM400	640 Hℓ	7	32 - 45 ton	42 - 60 ton	46Kw
